Press release

Jowat to showcase PUR hot melt adhesives not subject to GHS labelling at Techtextil 2019

Detmold, 08 April 2019 – "Space for Innovation" – In line with the headline of this year's Techtextil, the adhesives specialist from Detmold will be launching its all-purpose PUR hot melt adhesive for the automotive and textile industries. The product of the Jowatherm-Reaktant® MR series has a reduced monomer content and is therefore not subject to special labelling under GHS.

In the centenary year of the enterprise's foundation, Jowat will be putting the spotlight on innovative PUR hot melt adhesives for the automotive and textile industries at the Techtextil trade fair. The latest highlight in the adhesives manufacturer's product range is a PUR "all-rounder" especially suited for laminating automotive interior parts, which is not subject to classified chemical labelling under GHS. Jowat is thus responding to the growing demand in the automotive industry for all-purpose adhesives that can be used in the manufacture of laminated interior parts and that do not have to be declared as hazardous material. The product once more demonstrates the company's leading expertise in PUR technology.

The latest adhesive from the Jowatherm-Reaktant® MR series, which comprises a comprehensive portfolio of monomer-reduced PUR hot melts, also impresses due to benefits like a high green strength, low creep tendency, and advantageous VOC and FOG values. The adhesive can be applied by all established methods, especially by spraying.

Jowat supplies bonding technologies for all relevant lamination procedures in the automotive and textile industries. In addition, the enterprise prides itself in close customer contact and a strong dependability in the supply chain for maximum efficiency and process reliability, facilitated by the production of PUR-based adhesives in its own global manufacturing locations in America, Asia, and Europe.

For 100 years, the globally active adhesives specialist from Detmold has systematically and successfully been building on an impressive product diversity, deep industrial understanding, and comprehensive service in all things adhesive. You can find Jowat under the anniversary headline "Our word is our bond – since 1919" at Techtextil in Frankfurt-am-Main, hall 3.0, booth H89, 14 to 17 May.

Further information

Introducing Jowat

Jowat SE with headquarters in Detmold is one of the leading suppliers of industrial adhesives. These are mainly used in woodworking and furniture manufacture, in the paper and packaging industry, for graphic arts, in the textile, automotive as well as in the electrical industry. The company was founded in 1919 and has manufacturing sites in Germany in Detmold and Elsteraue, plus four other producing subsidiaries, Jowat Corporation in the USA, Jowat Swiss AG, Jowat Manufacturing in Malaysia, and the Jowat Universal Adhesives Australia Pty. Ltd. in Australia. The supplier of all adhesive groups is manufacturing over 90,000 tonnes of adhesives per year, with over 1.200 employees. A global sales structure with 23 subsidiaries plus partner companies is guaranteeing local service with close customer contact.
